

Light up the Web. A showcase of next generation experiences using Silverlight.

Old Texts in the New Media

Texts written by hand are complicated documents which are normally hard to read. Presenting them on the internet can help to overcome the limitations of a printed version.

Microsoft Silverlight™

Microsoft Silverlight is a cross-browser, cross-platform, and cross-device plug-in for delivering the next generation of .NET based media experiences and rich interactive applications for the Web.

By using Expression Studio and Visual Studio, designers and developers can collaborate more effectively using the skills they have today to light up the Web of tomorrow.

SILVERLIGHT CHARTS/GAUGES

Infragistics unveils Silverlight 2 Chart and Gauge CTP controls with breathtaking 2D graphics.

With Silverlight 2 Charts, developers can choose the best chart type to make voluminous data succinctly visual for users of forecasting and reporting apps. Meanwhile, Silverlight 2 Gauges empower next generation panel-like dashboard displays in new, intuitive ways.

[New Silverlight 2 Beta 1 Videos](#)

Friday, May 30, 2008

This week Jesse Liberty demonstrates the advantages of factoring out style information from individual control instances into Style objects and how to re-skin any control using templates. Tim Heuer demonstrates two important features of Silverlight and ASP.NET, using secure web services and using ASP.NET application services from within Silverlight 2.

[14 New Silverlight Showcase Entries](#)

Wednesday, May 28, 2008

The Silverlight Showcase is exploding with 14 new entries submitted by our community members. Listen to music from AllMusic Streaming, wander through a creative virtual world for kids at Shidoni, visit the Toronto Silverlight users group, or search for your ancestors at Moots, and more!
